Literacy

In literacy for the next 2 weeks our focus is on the skills developed in our new Read Write Inc groups. Our writing focus is on recount writing. For some of us this is drawing a picture and telling our teacher for others it is writing at least 5 sentences. We are also going to be reviewing syllables, rhyme and initial sounds during our shared reading lessons.

Numeracy

In Numeracy our current focus is money. We are learning to

- Name each coin (and note for our extension group)
- Recognise coins and notes
- Order coins and notes from least to most
- Realise that bigger coins do not have bigger values.

We are also going to look at coins from other countries. If you have any please bring them in.

HASS

In HASS this term we are going to be exploring maps of Australia and of the world. We will also be looking at some different celebrations that are held around the world including Halloween, Thanksgiving and Christmas.

Science

In Science this term we are going to be focusing on using our 5 senses to describe the world around us. We will be doing some fun experiments to practice these skills.

Wellbeing

With the weather warming up it is important that students are bringing hats to wear at break time. It is also important students are staying hydrated, we have the classroom water bottles but encourage students to bring a bottle from home too.
